The Power of Leaders

Code	M2089
Category	Leadership and Business Management
Duration	1 week

Introduction:

The power of leaders is the ability to influence individuals, shape organizational direction, and achieve strategic objectives through effective leadership, credibility, and responsible decision making. It integrates leadership influence, communication, emotional intelligence, organizational governance, strategic thinking, and people leadership to strengthen organizational performance and long term success. This training program explores leadership power frameworks, influence models, decision making methodologies, communication strategies, and organizational leadership practices that enhance executive effectiveness. It provides a comprehensive perspective on developing leadership capabilities that build trust, inspire commitment, and create lasting organizational impact.

Program Objectives:

By the end of this program, participants will be able to:

- Analyze leadership power frameworks and influence models that strengthen organizational effectiveness.
- Evaluate communication, credibility, and relationship management approaches that enhance leadership impact.
- Assess decision-making, emotional intelligence, and organizational governance practices that support effective leadership.
- Examine leadership influence, team engagement, and organizational alignment methodologies that improve performance.
- Explore strategic leadership approaches that foster organizational resilience, innovation, and sustainable success.

Target Audience:

- Executives and Senior Leaders.
